Summary

As a full-stack developer, I have extensive experience in building responsive websites and web applications using a range of technologies, including HTML, CSS, JavaScript, and frameworks such as React. On the back end, I have a strong background in languages such as Node.js and am proficient in working with databases such as MySQL and MongoDB. I am deeply passionate about developing high-quality, scalable software and I'm constantly seeking opportunities to learn and improve my skills. I am known for my ability to find simple solutions to complex problems, and for my aptitude for learning new concepts quickly.

Experience

Echelon CAE Services Pvt. Ltd | Maharashtra, Pune

Jr. Software Developer | 06/2022 - Present

Project : Mindvein E-commerce Web Application

Introduction: The purpose of the project was to build a user-friendly and responsive e-commerce platform that allows customer or patient to consult doctors. The scope of the project included the development of the front-end and back-end of the application, as well as the integration of Easebuzz payment gateway and Zoom Integration

Responsibilities: As a MERN stack developer, my responsibilities included:

- Building the front-end of the application using React, including the design and implementation of the user interface and the creation of components for product listings, shopping carts, and checkout pages
- Developing the back-end of the application using Node.js and Express, including the creation of REST APIs for product management, and payment processing.
- Integrating the front-end and back-end of the application using Redux for state management and Axios for API calls

Challenges: One of the key challenges I faced during this project was ensuring the seamless integration of the front-end and back-end of the application. I had to carefully design the REST APIs and use appropriate libraries and tools, such as Axios and Redux, to handle data flow and state management.

Project: Vaidya Clinic

Introduction: I am currently working on the project is to build a web-application for ayurvedic doctors. My responsibilities include to handle patient details and clinical data.

Skills

HTML, CSS, React Js, Node.js, Express.js, MongoDB, Python, MySQL, JavaScript
